

N NAVEEN KUMAR

Engineering Manager | Backend Development & Architecture Leader | 14+ Years Banking and Financial Services | Team Leadership & Technical Excellence

✉ naraharinaveenqa@gmail.com

☎ +91- 8970322333, +91- 8074036650

PROFILE SUMMARY

- An Accomplished Engineering Manager with **14+ years** of comprehensive IT experience, including **8 years** of specialized C# backend development and **3+ years** of proven people management expertise in investment banking technology.
- Leveraged **GitHub Copilot** to accelerate coding, improve test coverage, and enhance developer efficiency
- Successfully architected and delivered enterprise-scale solutions utilizing Oracle databases, **.NET frameworks**.
- Demonstrated track record of leading high-performing development teams while driving technical innovation and ensuring regulatory compliance in mission-critical financial environments.
- Proven ability to bridge technical excellence with strategic business objectives, **mentoring talent**, and delivering complex projects that directly impact bottom-line results.
- Maintained technical debt for feature team of confirmation and settlements over 2 years period as part **agile master** role
- Expert in agile principles especially on **pair programming, debugging**
- Implemented multiple **POCs** to take business decisions for a key project
- Successfully developed scripts for build, deployment, maintenance and related tasks as part of **shipped release** process from dev to prod cycle in **Release Manager** role
- Well versed with monitoring (Kibana, Grafana) and CI tools (Jenkins, Gerrit)
- **Skilled in mapping business requirements** by interacting with clients and assisting the development team in translating them into functional specifications, services, and implementations by following the quality standards and guidelines
- Proven success in taking independent **ownership of all technical aspects of application development lifecycle**; achieved on-time & quality delivery of multiple product releases for high-profile clients such as **JPMC, UBS, GS CLS, Wells Fargo and BOA**
- **Employee of the year** nomination for 2023-24 in SOCIETE GENERALE – X-One FXC

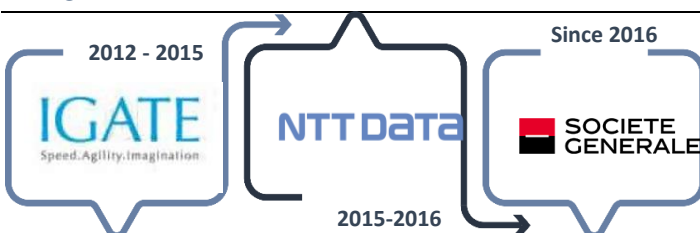

EDUCATION

- **B.Tech. (Electrical & Electronics Engineering)** from Jawaharlal Nehru Technological University, Anantapur with 73% in 2011
- 12th from Sri LRG Naidu Junior College, Hindupur, Board of Intermediate Education with 95% in 2007
- 10th from Sri Saraswathi Vidya Mandir Telugu Medium School, Hindupur, Board of Secondary Education with 85% in 2005

Certifications:

- ISTQB Foundation Level and Level 1 Certification in Software Testing in 2013
- Level 1 Certification in Software Testing, Pune, 2012

CAREER TIMELINE

CORE COMPETENCIES

Enterprise Level Application Design & Development

Technical Architecture

Software Development

Project Management

Stakeholder & Risk Management

People Management

Team Building & Leadership

TECHNICAL SKILLS

Languages:

- C# , SQL, VB Script

Technologies

- Net core and net framework

Test Automation Tools:

- QTP 10.0, UFT 11.0, 11.5, 12.0

Tools:

- CoPilot, JIRA, VS 2022, VS Code

CI CD Pipeline Tools:

- Jenkins, Git, Gerrit

WORK EXPERIENCE

Chapter Manager Software Engineer
Société General Global Solution Centre, Bangalore

Since Mar'23

Key Result Areas:

- Managing backend development and leading multiple teams; assisting in production support resolve issues on urgent basis
- Conducting release activities like code merge and deployment on weekly basis
- Developing C# Framework; enhancing existing framework on daily basis by adhering to OOPS concepts and also aligning to latest .net core versions
- Maintaining Jenkins factory test cases on daily basis by mocking specific data Rhino Mock and Record and play techniques
- Interfacing with clients** for gathering business needs, analyzing & reviewing business, functional and high-level technical requirements and finalizing technical / functional specifications, HLD and LLD for the project
- Defining **solution architecture** based on RFP; defining & presenting technology stack for proposed solution; designing & implementing re-usable components for proposed architecture
- Designing detailed technical components** utilizing high-level architecture, design patterns and reusable code, considering real time constraints, functional & non-functional requirements
- Providing post-implementation, application maintenance and enhancement support to the client with regard to the software application; ensuring all solutions are scalable, extensible & available from architecture stand point
- Administering the project; interacting with client, working on **gathering client requirements, provide estimates** and deciding project timelines
- Assigning tasks to the team**, review the tasks and ensure that the deliverables are prepared to satisfy the project requirements, cost and schedule; communicating with external team in driving the project
- Measuring code clean using sonar tools and maintain on regular basis and demo same
- Providing solutions** to client's requirements involving design & debugging jobs for cleansing & transforming data according to business rules
- Mentoring new team members** who have joined this project on the technical and functional aspects
- Conducting discussions during Agile Demos and UAT discussion meeting**
- Designing detailed technical components utilizing high-level architecture, design patterns and reusable code, considering real time constraints
- Ensuring best practices for coding, architecture & security are employed & maintaining responsibility for the quality development of all applications

Highlights:

- Successfully completed delayed projects** essential for operational efficiency by identifying and solving complex technical problems using interdisciplinary teams; restricted the schedule delay
- Drove efforts towards maintaining .net development** practices; adhered to company standards for coding and unit/functional test coverage

PREVIOUS EXPERIENCE

Application Software Development Consultant
NTTDATA Global Delivery Solutions Ltd., Bangalore

Aug'15 – Aug'16

Key Result Areas:

- Enhanced QTP automation framework for Remittance Centre Project
- Analyzed and successfully overcame technical challenges during the RC project maintenance

Senior Software Engineer
iGATE Global Solution Ltd., Bengaluru

May'12 – Aug'15

Highlights:

- Steered efforts in developing QTP automation framework, Excel Tool for DB Testing Validation
- Collaborated with the Development Manager to define / improve development methodology and processes

PERSONAL DETAILS

Date of Birth: 27th August 1990

Language Known: English, Telugu, Hindi and Kannada

Current Address: Whitefield, Bengaluru – 560067

ANNEXURE (PROJECTS UNDERTAKEN)

Project:	X-One FX Conf and Settlements	Domain:	Investment banking – Global FOREX Markets
Client:	In House Tool	Period:	Since Sep'16
Technology:	Net Core 3.0, .Net Framework 4, C# 8.1	Applications:	X-One
		Methodology:	AGILE
Description:	The project is to generate Confirmations (CLS, SWIFT MT300, Web, Email) and Settlements (MT103) to Forex Trades worldwide for various internal and external clients of Société Générale, this is a Front to back office trade application which involves entire Trade life cycle, Uses complex message-oriented middleware infrastructure to interact multiple windows/web services and consumers		
Highlights:	- Managing CLS and SWIFT messaging and payments systems - Providing tech design and implement complex requirement - Deploying and Jenkins pipeline of micro services and DB packages - Design scalable web API for confirmations and blotter view of external clients which should be highly maintainable and responsive - Gathering Requirements from business operations team and do an independent estimate from detailed functional specification - Designed and developed scalable framework for Oracle DB archival systems and micro services ultra for high volume of tables - Develop MT to MX migration as part of ISO 2022 global SWIFT program - Multiple projects developed under CLS back perimeter using external API systems - Writing Unit test cases using NUnit Framework and perform Integration testing - Following AGILE methodology ritually throughout Sprint Cycle Technologies Used and Frameworks: - Working on X-One application development predominantly backend with C# .NET uses MOM – Message Oriented Middleware – TIBCO, WebSphere MQ, NATS, Web API, Consul for Micro services and Service Oriented Architecture - Creating new batches using Autosys and maintain on daily/weekly monthly basis and new windows services/consumers using X-One framework		

Project:	X-One CBO Historization	Domain:	Investment Banking – Global FOREX Markets
Client:	In House Tool	Period:	MAR'22 – DEC'24
Technology:	C# .net	Role:	Application Software Development Consultant
		Methodology:	AGILE
Description:	The project is about archiving billions of data from source to live data base with zero downtime of application on weekly basis recurrently. Technology used is micro services and trigger framework with OCP DB as destination historized DB.		

Project:	Amdocs Regression Testing	Domain:	Banking and Financial Services
Client:	Union Bank of California	Period:	Sep'13 - Aug 15
Role:	Quality Engineer/ Senior Engineer V n V	Applications:	AMDOCS, Micro Focus RUMBA (Main Frames)
Technology:	Automation Testing9Uft11.5 Tool)	Methodology:	AGILE
Description:	The project is about automation test script design and developing automation framework for windows-based applications like AMDOCS and framework design for Main frame application RUMBA, Executing the automated test scripts for one cycle and preparing daily status, raising observations to onsite and defect tracking in HP ALM, Interacting with clients on daily basis		

Project:	Single Sign on and Single Sign on Administration (SSO and SSOA)	Domain:	Banking and Financial Services
Client:	Union Bank of California	Period:	Sep'12 to Aug'15
Role:	Quality Test Engineer/ Senior Software Engineer	Applications:	AMDOCS, Micro Focus RUMBA (Main Frames)
Technology:	UFT	Methodology:	AGILE
Description:	The project mainly focused on development of automation framework and preparation of regression suit for retail, commercial & wholesale banking applications like internet business banking & online banking. This project has been implemented in AGILE methodology for 12 sprints with 15 days each sprint
